Letter No. 2082/58-) dated 6-9-58 from the Chairman BSB requesting that a meeting may be called for to discuss the question of entrusting the Drainage Work to the Contractors.

Flag 'A'

Submitted:- 1) The letter No. L 3932-33/9758 24-55-30 dated 31.5.56 the Chairmen of BSB and MTB were instructed to observe that the practice of taking the Works after calling for tenders. They were also informed that any deviation from the procedure indicated would mean enforcing personal responsibility on the officers concerned.

2) The Chairman BSB states that the System of calling for tenders for the Labour portion of the work only is in vogue for the last several years and that this has also been approved by Govt. He further states that either individual tenders have to be invited for each work as and when sanctioned or tender have to be invited for each Range for all the works proposed to be taken up during the year. and that the latter system appears to be advantageous as far as Drainage Dept is concerned. He finally requests that a meeting may be called for and the subject discussed at a meeting of the Dy Secretary, Dy Director, CE Mysore, Chairman BSB and Drainage Engineer.

OFFICE OF the Chairman,
City Improvement Trust Board,
Bangalore.

No. 2082/C&T
Encls.

Date 6th July 1956.

To The Secretary to Government,
Education & L.S.G.Departments,
Bangalore.

Sir

Sub: Estimate for Rs.48,000/- for laying Underground Sewers in parts of Vasanthanagar Layout -- piecework system on tendered rates.

With reference to your letter No.L.3084/M1.24-55-28 dated 12th May 1956 and No.L.3932-33 dated 31st May 1956 on the above subject, I write to state that the work has not been entrusted without calling for tenders. Tenders are invited for layout and underground Drainage works separately for the three Ranges in the Trust Board, viz., North, South and Central Ranges and works are entrusted to tendered contractors at the tendered rates only. There has beenn no deviation from the tendered ~~rates~~ system. In this connection it has to be pointed out that the stone-ware pipes which form 80% of the work will be supplied Departmentally at the S.P.C.rates to contractors. Tender for the Labour portion of the work only is called for. This system has been in vogue for the last several years and this has also been approved by Government. If individual tenders have to be called for in respect of each work under the layout, the present procedure of calling for tenders for the three Ranges for all works proposed to be taken up during the year will have to be discontinued. There cannot be two systems. Either individual tenders have to be invited for each work as and when sanctioned or tenders have be to be invited for each Range for all the works proposed to be taken up during the year. So far as the Trust Board works are concerned, the latter system appears to be advantageous

for

for the expeditious execution of works.

2) I, however, seek further instructions of Government with regard to the procedure to be adopted in future and the opinion of the Chief Engineer may be obtained in this matter.

3) I personally seek no objection in adopting the latter system as there will be greater competition and the rates quoted are advantageous to the Board. A larger number of smaller contractors will tender as the earnest money will be within their means.

4) There will not be appreciable progress on works as the procedure of calling for tenders for individual works will be laborious and takes a long time before the tender is finally approved by the Board and the Government and the work is put on hand. However, I suggest that the matter may be discussed at a meeting of the Secretary to Government, Education & Local Self Govt. Departments, Secretary to Government, Public Works Department and Chief Engineer of Mysore, along with the Chairman and the Engineer Officer of the Board. An early date may be fixed and intimated.

Yours faithfully,

(B.V.Lankappa)
Chairman.
